

# Integrating PowerApps as a Web-part In a SharePoint site

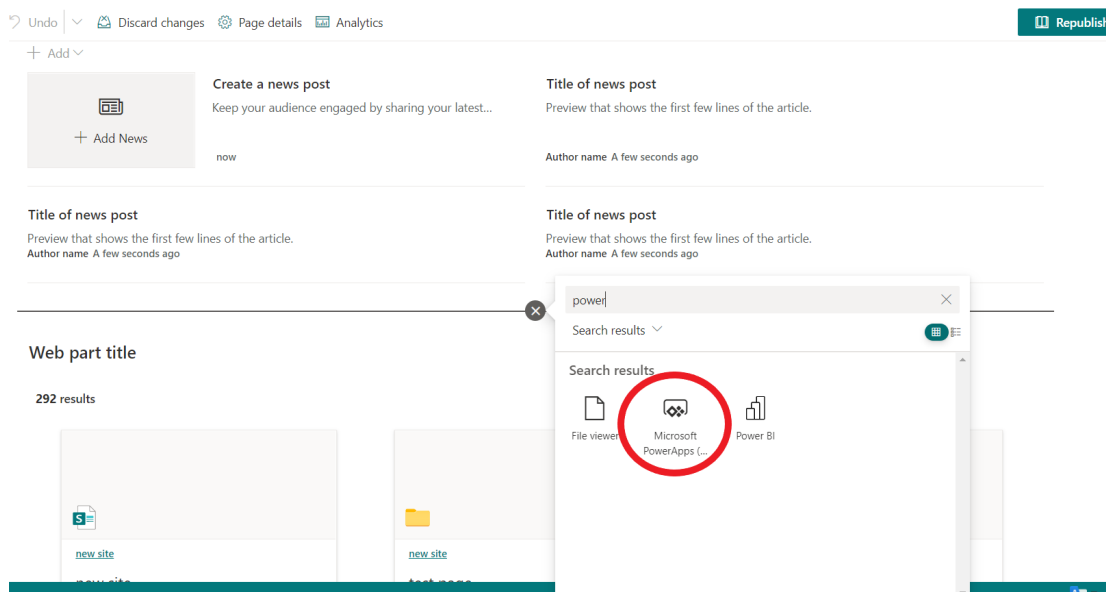

In this documentation we will discuss and perform all the steps how to integrate a canvas apps into a SharePoint site as a web-part.

Here are the following steps to achieve the above mentioned scenario.

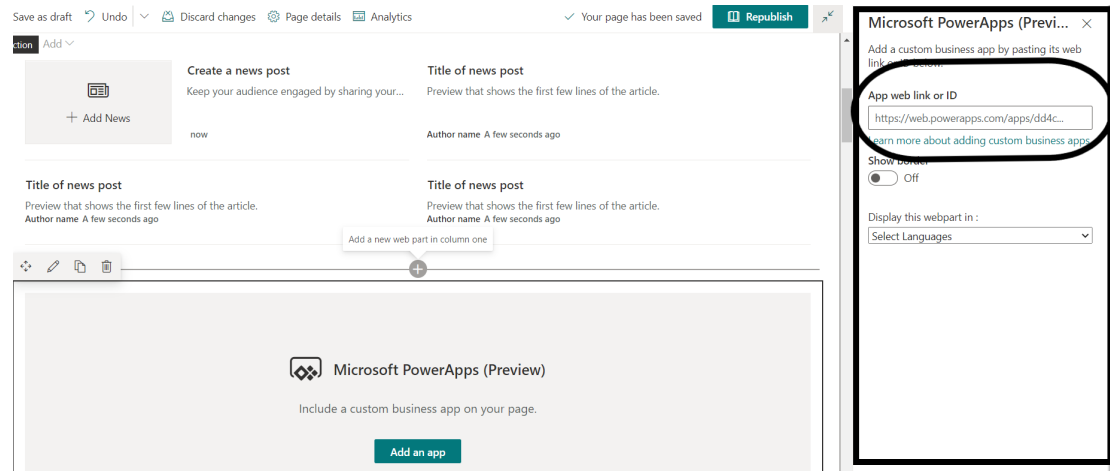

1. Log in into your SharePoint site tenant and chose a communication site if present, otherwise create a new communication site.
2. After successfully login to the site, select a section where you want to add your PowerApps. Before that you should make sure you have a apps with same tenant as PowerApps.
3. Click on the “Edit” button which will present on the right top corner of the page to edit the web-part and section.

4. After clicking on the edit button choose a section where you want to add the PowerApps, on hovering on the end of the section you will find a “+” button on clicking on that we will find the web-part option an on the search bar you can search for PowerApps.

5. After choosing the PowerApps option it will ask for you the app id or web-link of your application.

6. After providing the web-link or app id, it's all set your PowerApps now integrated with the SharePoint web-part.

You can also do some changes as per your requirement concern.
